

PROJECT KNOWLEDGE SYSTEM

Some Facts

- Knowledge search takes 20-30% of the time
- 70% of the knowledge leaves with people
- Low visibility on personal competency
- Vital information scattered across email boxes
- High rate of project failures

Pain Areas

- High learning cost
- High attrition
- Increasing competition
- Continuously changing business
- Lack of scalability
- Underutilized workforce

Unique Selling Points

- Our focus
- Complete, end-to-end
- Sophisticated system
- Simplified, cost-effective
- Designed for managing project knowledge
- Facilitated by KM consulting

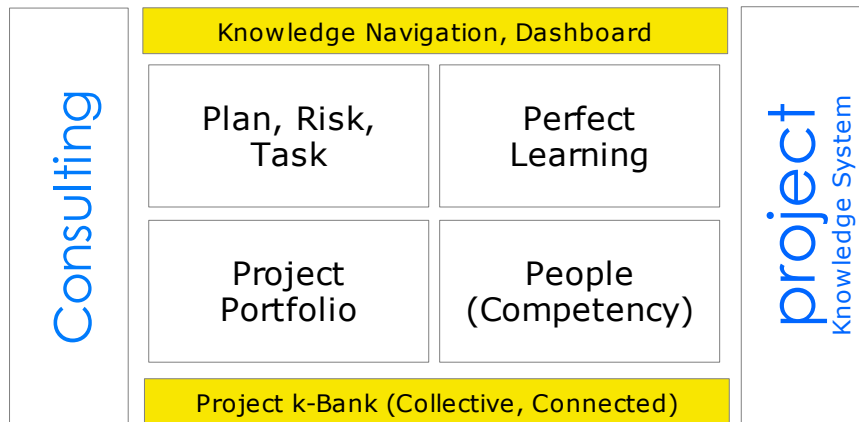

Driving a project towards success is becoming a big challenge due to continuous changes, recklessly growing workforce and increasing customer expectations. Following are essential to make projects successful:

- ◆ Gaining visibility through personal competency and project dashboards that helps discover the performance gap and avoid possible disasters.
- ◆ Leveraging true potential of the project team using a scalable model for resource management and learning that accelerates growth.
- ◆ Building connected knowledge bank to retain and reuse the lessons learned that helps save organizational energy.

Our Solution

Wise *Project Knowledge System* from Lpcube is an innovative platform for managing project knowledge, smartly utilizing resources and driving perfect learning in line with individual needs and project requirements.

KM Consulting services help implement, drive and manage the system successfully.

KM Consulting

An **innovative consulting methodology** for institutionalizing knowledge and making KM an integral part of project management. Our KM experts work with PMO and project managers to help:

1. Discover the pain areas and performance gap.
2. Suggest right system and strategy.
3. Build a team of champions.
4. Implement and drive in line with the business objectives.
5. Train people on KM and the knowledge system.
6. Drive the KM project and facilitate change.

"I am truly impressed with what you have achieved in these 5 years. Building a software product in the KM space which is pragmatic in its design and approach, is not easy. Your KM solution is really well thought out and easy to use and implement. I look forward to many more innovations from you in the years to come."

Mr . Sandeep Dhar
President, Mphasis BPO

Benefits

1. Improves operational excellence and drives success in projects.
2. Helps turn the collective lessons learned into an intellectual capital.
3. Provides easy access to knowledge so that the time saved can be utilized productively.
4. Empowers leaders to systematically and effectively manage the projects and its resources.
5. Helps the project team members to plan and learn based on their skills gap.
6. Help manage risks, monitor the progress and keep top management up-to-date without pain.

Who Benefits?

Small, medium and large Organizations:

- Managing projects by leveraging the resource pool.
- Spending lots of time and money in training.
- Working on providing easy access to right knowledge.
- Planning to setup an effective communication platform.
- Thinking about maximizing growth and scalability.
- Finding great difficulties in differentiating and competing.

ROI Plan

We help measure success by systematically monitoring the progress based on Key Performance Indicators (KPIs) such as competency, learning cost, resource utilization, duration, customer satisfaction and so on.

Committed organizations can significantly increase productivity, develop competitive edge and gain intangible benefits such as good will and enriched work environment to scale and sustain.

Product Architecture

- ◆ Web-based, intelligently integrated, highly scalable and expandable
- ◆ Uses Java, JSP, Ajax, XML, Lucene APIs, DB Broker
- ◆ Runs on any java-enabled database and application servers
- ◆ Supports Intel based Windows, Linux and Unix servers
- ◆ Requires desktops (Windows, Linux or Mac) running IE or Firefox

*"Businesses will increasingly incorporate **collective intelligence** working patterns within their business models and embrace KM for building high-performance workforce."*
